<u>Permit No.:</u>	9900-0197
<u>Violation(s) Cited:</u>	South Carolina Air Pollution Control Regulation 61-62.1, Section II, <u>Permit Requirements</u>

Summary: Palmetto Paving Corporation is a hot-mix asphalt production facility and operates pursuant to General Conditional Major Operating Permit GCMP03-9900-0197, effective July 15, 1997, and subsequent construction permits. On August 3, 2001, and April 18 and August 7, 2002, Department personnel conducted inspections at Palmetto Paving Corporation and determined that it had replaced its existing baghouse with a new baghouse, removed its batch-mixer and replaced it with a drum-mixer, and had installed and operated two asphalt coke-heaters prior to obtaining the necessary permits from the Department. Department records also indicate that Palmetto Paving Corporation installed four No. 2 fuel oil storage tanks and an asphalt sealer storage tank prior to obtaining the necessary permits or exemptions from the Department.

Action: On November 20, 2002, the Department issued Palmetto Paving Corporation a Notice of Violation and a Notice of Enforcement Conference and an enforcement conference was held on December 16, 2002. A Consent Order was negotiated in which Palmetto Paving Corporation agreed to ensure that it applies for and obtains appropriate permits or exemptions prior to constructing, altering, removing, or adding any sources of air contaminants, and pay a civil penalty in the amount of seven thousand dollars (\$7,000.00). The penalty is due April 25, 2003.

Summary: Triangle Ice is a facility that manufactures ice. Triangle Ice is subject to the Chemical Accident Provisions of the Clean Air Act because of the quantity of anhydrous ammonia it stores and uses in its process. An inspection conducted on May 16, 2002, indicated that Triangle Ice did not adequately implement all aspects of its Risk Management Program.

Action: On March 5, 2003, the Department issued Triangle Ice a Notice of Violation. A Consent Order was negotiated in which Triangle Ice agreed to comply with Department regulations regarding the implementation of its Risk Management Program, and pay a civil penalty in the amount of four thousand eight hundred dollars (\$4,800.00). The penalty has been paid.

53) Order Type and No.: Consent Order 03-018-A
 Order Date: April 11, 2003

 Air Pollution Control Regulation 61-62.1, Section II, Permit
 Requirements, S.C. Code Ann. § 48-1-110(d), and U.S. EPA NSPS
 Subpart A.

Summary: North Safety manufactures rubber gloves. North Safety Products failed to install a VOC monitor on its Solvent Recovery Unit ("SRU") in a timely manner; comply with the requirements of its Title V permit in that it did not establish and submit operational ranges for the SRU; and submit semiannual VOC emissions monitor reports and visual inspection reports for the SRU and Boilers # 1 & 2 for the reporting periods ending October 31, 2001, and April 30, 2002. On July 31, 2002, the Department received a construction permit application from North Safety for a 12.55 mmBTU/hr boiler. On August 22, 2002, the Department conducted an inspection and determined that North Safety had commenced construction on the aforementioned boiler. The Department issued the Construction Permit on September 19, 2002. North Safety also failed to submit a timely request for an operating permit, as well as a timely notification of construction and notification of startup of operations as required by Federal New Source Performance Standards.

Action: On July 31, 2002, the Department issued North Safety a Notice of Violation for the reporting violations, and an Enforcement Conference was held on August 8, 2002. On December 4, 2002, the Department issued North Safety a Notice of Violation for the violations related to the installation of the boiler, and

an Enforcement Conference was held on December 11, 2002. A Consent Order was negotiated in which the facility agreed to comply with the reporting requirements of its Title V Operating Permit by submitting the missing information; henceforth to ensure that it applies for and obtains all necessary permits prior to the construction, removal or alteration of any source of air pollution; and to pay to the Department a civil penalty in the amount of fifteen thousand dollars (\$15,000.00). The penalty is due May 14, 2003.

 Ann. §48-1-110(d)

Summary: Union County Printworks is a facility that produces screen-printed fabrics. Union County Printworks installed and operated a 4.5 x 106 Btu/hr natural-gas-fired dryer prior to applying for and obtaining the required Department-issued permits. An inspection conducted on September 23, 2002, indicated that Union County Printworks had also installed a natural-gas-fired tenter frame and a 1.5 x 106 Btu/hr natural-gas-fired boiler prior to obtaining the required Department-issued permit or exemption. Additionally, Union County Printworks failed to maintain any monthly VOC and HAP emissions records as required by its Operating Permit. On December 31, 2002, the Department issued construction permits or exemptions for the unpermitted equipment.

Action: On August 29, 2002, the Department issued Union County Printworks a Notice of Violation and a Notice of Enforcement Conference, and an enforcement conference was held on September 17, 2002. On November 5, 2002, the Department issued Union County Printworks a Notice of Violation for the additional violations noted during the September 23, 2002, inspection. A Consent Order was negotiated in which Union County Printworks agreed to comply with Department regulations regarding permitting requirements, maintain monthly VOC and HAP records as required by its permit, and pay a civil penalty in the amount of seven thousand dollars (**\$7,000.00**). The penalty is due May 11, 2003.

55) Order Type and No.: Consent Order 03-022-A

<u>Violation(s) Cited:</u>	S.C. Code Ann. ??48-1-110(d) and South Carolina Air Pollution Control Regulation 61-62.1, Section II, Permit Requirements

Summary: Conbraco Industries manufactures steel castings, industrial ball valves, and machined screw products that function as valves. Conbraco Industries operates pursuant to Conditional Major Air Quality Operating Permit CM-1340-0061, effective July 8, 1998. On February 20, 2002, Department personnel conducted an inspection at Conbraco Industries and determined that it failed to: include operating ranges for monitored parameters of scrubber SCR-15 in its Monitoring Plan; record actual monthly operating hours for emergency generator EG1 since May 2001 and for emergency generators EG2 and EG3 since August 2001; submit annual reports of operating hours for its emergency generators, which were due no later than August 7, 1999, 2000, and 2001; ensure that a liquid flow meter was operating properly on scrubber SCR-6; and submit Monitoring Plan Certifications, which were due no later than August 7, 1999, 2000, and 2001. On March 6, 2002, Department personnel conducted a follow-up inspection at Conbraco Industries and determined that it failed to obtain a construction permit or exemption prior to installing and operating a Teflon(r) seal manufacturing process and a wood shop that vents emissions to a dust filter. Conbraco Industries also failed to submit a Monitoring Plan Certification and an annual report of operating hours for its emergency generators, both of which were due no later than August 7, 2002.

Action: On November 14, 2002, the Department issued Conbraco Industries a Notice of Violation and a Notice of Enforcement Conference and an enforcement conference was held on December 16, 2002. A Consent Order was negotiated in which Conbraco Industries agreed to ensure that it records actual monthly operating hours for emergency generators and submits annual reports of these records, submits Monitoring Plan Certifications, operates liquid flow meters, and applies for and obtains appropriate permits or exemptions prior to constructing, altering, removing, or adding any sources of air contaminants; to submit the information necessary to make a permitting determination for the Teflon(r) seal manufacturing process and the wood shop and dust filter; and to pay a civil penalty in the amount of five thousand dollars (**\$5,000.00**). The penalty has been paid. Conbraco Industries has also agreed to complete an independent third party audit at the facility to determine compliance with applicable air regulations, and submit a report summarizing any findings of non-compliance and indicating the course of action taken to remedy the violations.

Summary: Fieldcrest Cannon is a textile finishing plant. An investigation indicated that in August 1999 Fieldcrest Cannon had modified its process chemistry to include methanol. This change resulted in methanol emissions in excess of the major source threshold of ten (10) tons per year. Fieldcrest Cannon failed to submit a construction permit application for this process modification and failed to submit a Title V permit application within one year of becoming subject as required by Department regulation. On June 4, 2002, the Department issued Fieldcrest Cannon Title V Operating Permit TV-2180-0026.

Action: On August 29, 2002, the Department issued Fieldcrest Cannon a Notice of Violation and a Notice of Enforcement Conference, and an enforcement conference was held on October 23, 2002. A Consent Order was negotiated in which Fieldcrest Cannon agreed to comply with Department permitting requirements and pay a civil penalty in the amount of five thousand dollars (\$5,000.00). The penalty has been paid.

Summary: Moore Drums Inc. (Respondent) is a drum reconditioning facility. The Respondent has violated the South Carolina Air Pollution Control Regulations, the Hazardous Waste Management Regulations, and the South Carolina Pollution Control Act as follows: failure to maintain visible and fugitive emissions from its reclaiming furnace and stack below twenty percent (20%) opacity; failure to continuously measure and record the temperature of its afterburner; failure to ensure its afterburner was in operation continuously while operating the reclaiming furnace and for burning un-permitted cardboard drums in its reclaiming furnace; failure to submit semi-annual operation and maintenance manual certifications and daily visual inspections for 2001; failure to obtain a construction permit prior to construction of an additional fan and stack; failure to request an operating permit from the Department within fifteen (15) days prior to operating new equipment; failure to accurately certify its compliance status on its Title V Annual Compliance Certification; failure to make an accurate hazardous waste determination; failure to mark its containers either with the words "Hazardous Waste" or other words that identify the contents of the containers; failure to clean up a hazardous waste discharge; failure to inspect its facility for malfunctions and deterioration, operator errors, and discharges; failure to have the emergency coordinator immediately identify the character, exact source, amount, and real extent of any released material and notify the Department; failure to note in the operating record the time, date, and details of any incident that requires implementing the contingency plan and submit a written report to the Department; failure to close all containers holding hazardous waste except when necessary to add or remove waste; and failure to prevent the discharge of organic or inorganic matter into the environment of the State except as in compliance with a permit issued by the Department.

Action: The Respondent has agreed to: comply with all applicable State and Federal Air Quality Regulations; ensure that an accurate hazardous waste determination is made on all solid wastes; manage containers of hazardous waste in accordance with R.61-79.262.34 and R.61-79.265 Subpart I- Use and Management of Containers; clean up any discharge of hazardous waste that occurs at the facility; inspect the facility for malfunctions and deterioration, operator errors, and discharges which may be causing or may lead to releases; ensure that the emergency coordinator complies with all applicable regulations regarding releases; note any incident requiring the implementation of the contingency plan in the operating record and notify the Department; ensure that oil and other wastes are not allowed to discharge into the environment of the State except as in compliance with a permit; submit within thirty (30) days of the effective date of this Order, a Sampling and Analysis Plan for review and approval by the Department; submit within thirty (30) day of the effective date of this Order, a Work Plan for review and approval by the Department; reimburse the Department on a quarterly basis for the oversight costs required under this

Order; and pay a civil penalty in the amount of thirty thousand dollars (\$30,000.00) to the Bureau of Air Quality and nineteen thousand dollars (\$19,000.00) to Bureau of Land and Waste Management.

R. 61-62.1, Consent Order 00-003-A, 48-1-110(d)

Summary: Orion Finishing desizes, bleaches, and finishes polyester-cotton fabrics. On October 26, 2000, Department personnel investigated an odor complaint. The odor was originating from the wastewater treatment plant at the facility. During the investigation the Department inspector noted excessive stack emissions and found that the facility had rerouted emissions prior to obtaining the appropriate permits. The inspector also found that the facility failed to maintain volatile organic compound (VOC) and hazardous air pollutant (HAP) consumption and emissions records. During a May 2002 inspection, the Department determined the facility was still not maintaining VOC and HAP records and had not submitted a construction permit application for the rerouted emissions. The facility had also installed a boiler without obtaining the appropriate permits. In September 2002 the Department received construction permit applications for the rerouted emissions, the boiler, and a proposed piece of equipment.

Orion Finishing also owns and operates a wastewater pretreatment facility ("WWPTF") associated with its textile finishing plant. In 1997, the Bureau of Water issued Consent Order 97-027-W to Orion Finishing for violating Conditional Final Construction Approval #14,906, in that it failed to properly operate and maintain its WWPTF. As a result of the enforcement action, the facility provided a schedule to complete a proposed upgrade no later than June 19, 1998. In October 1998, the facility considered a "closed loop" wastewater treatment system and the Department issued a permit to construct in September 1999. The project was started but the facility did not complete the project. From January through September 2002, the Department investigated seven odor complaints.

Action: On August 26, 2002 the Department issued a Notice of Violation and Notice of Enforcement Conference for the violations noted and a meeting was held with the facility on September 10, 2002. A Consent Order was negotiated in which Orion Finishing agreed to operate and maintain its WWPTF in accordance with regulatory requirements, comply with permitted limits for visible emissions, maintain VOC and HAP emissions records, submit plans and specifications and an application to construct pressure vessels associated with the wastewater treatment operations by June 1, 2003, complete installation and begin operation of the vessels within two months of obtaining a permit to construct the pressure vessels, and to pay to the Department a civil penalty in the amount of twelve thousand dollars (**\$12,000.00**), payable in three equal payments of four thousand dollars each within 30, 60, and 90 days, respectively. Four thousand dollars (\$4,000.00) of the penalty is assessed for Bureau of Water violations and eight thousand dollars (\$8,000.00) is assessed for Bureau of Air Quality violations.
